DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

At least one additional compound:

- A. a monoester containing at least one alkyl ether group
- B. a monoester of benzoic acid and long chain alcohol or ester alkanol, or fatty oil
- C. a diester formed by the reaction of a dicarboxylic acid where the two carboxylic acid groups are separated by a straight or branched chain alkyl group or an aryl group; and an aliphatic or aromatic alcohol; said diester further comprising at least one alkyl ether group
- D. a triester formed by (i) the reaction of aromatic tricarboxylic acid and an aliphatic or aromatic alcohol, or (ii) the reaction of a polyol having primary hydroxyl groups and analiphatic carboxylic acid

The species are independent or distinct because they possess materially different qualities and structures and would result in a materially different composition with patentably distinct characteristics.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 1 and 56-60 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 1615

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
